## A note about using this list

This list is meant as a starting point for exploring the organisms found at our Finca Las Piedras field station, not an authoritative guide. Numbers for some groups are inflated due to duplicate entries, misspellings, or misidentifications; most groups, however, are almost certainly vastly underestimated due to insufficient sampling. Please reach out to us with questions about any of the species found in this list at [info@sustainableamazon.org](mailto:info@sustainableamazon.org).
